I'm a software developer who is ambitious to learn since childhood, creates solutions for troubles by performing strong studies and has unexaggerated self-confidence. I have always been a person who approaches positively to the problems, focused on his internship and job, and working without confusion. I extremely believe that in order to reach my career goals in the long term, I'm going to focus on my job comprehensively by considering every job I'm in as a lesson to myself.

Technologies : Java, Jakarta EE, Spring, Spring Boot, Kotlin, SQL, Git, Docker.

Languages : Turkish: Native Language, English: B2

Programming resources used for self-learning: Patika.dev, Turkcell Geleceği Yazarlar, Akın Kaldıroğlu(Udemy), Levent Ergüder(Udemy), injavawetrust.com.

Interests: I have been involved with basketball since high school years. I participated in tournaments with various teams. During my university years, I took part in Photography, Folk Dances and Latin Dance clubs. Again at university, we formed a concrete canoe team with my classmates at the university and participated in the competition.
